

Security

Authentication vs Authorization

oAuth2:

- 1. Resource Owner (Human User)
- 2. Client (Application)
- 3. Authorization Server (Issues Tokens)
- 4. Resource Server (Secured Data is kept)

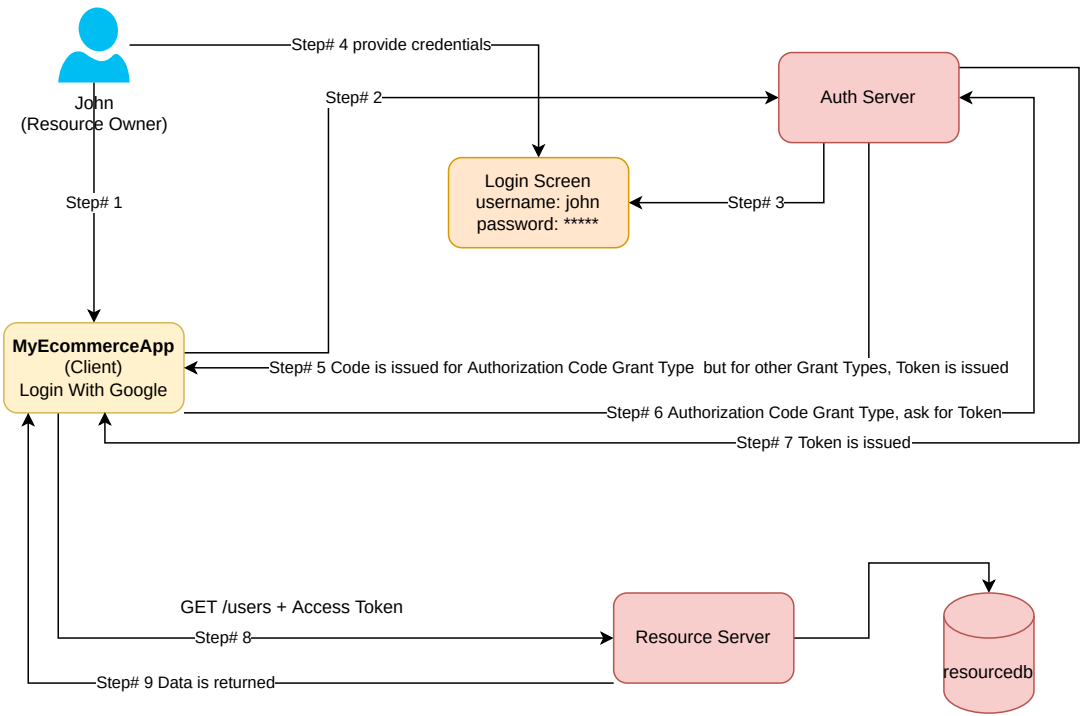

Grant Types:

- 1. Authorization Code
- 2. Implicit (Deprecated)
- 3. Password
- 4. Client Credentials (Not Human User)

Access Token (to get data)

Refresh Token (to get new access token)

JWT: Json Web Token

Microservices (Bigger Picture)
